OBJECTIVE

Motivated MERN Stack Developer with practical experience building full stack web applications using React, Node.js, Express, and MongoDB. Skilled in developing REST APIs, implementing authentication systems, real-time features, and third-party integrations. Seeking an opportunity to contribute to real-world projects while strengthening full stack development expertise.

EDUCATION

B. Tech in Computer Science — IIIT, RGUKT, RK Valley Final Year — CGPA: 9.1
Pre-University Course — IIIT, RGUKT, RK Valley CGPA: 10.0

SKILLS

Programming Languages: Python, C, JavaScript, TypeScript, Java

Backend Development: Node.js, Express.js, RESTful API Development, RESTful API Design, Backend Architecture, Business Logic Implementation

Frontend Development: React.js, HTML5, Tailwind CSS, Bootstrap, CSS3, Responsive Design, Redux Toolkit

Databases: MongoDB (Data Modeling, Aggregation, Query Optimization), SQL

Version Control: Git, GitHub

Tools Devops: Docker (basic), Postman

EXPERIENCE

Full Stack Developer (Project Experience) Independent / Academic Projects

- Built multiple MERN stack applications focusing on real-time workflows, authentication, and API integrations.
- Developed and deployed responsive user interfaces using ReactJS and TailwindCSS.
- Designed and implemented REST APIs using NodeJS, Express, and MongoDB.

PROJECTS

MedoSof – Medical Shop Automation System

[Demo](#) | [GitHub](#)

- Developed scalable RESTful APIs and backend services using Node.js, Express.js, and MERN stack for inventory management, billing automation, and operational workflows, reducing processing time by 35% with optimized CRUD operations.
- Designed efficient MongoDB schemas with indexing and aggregation pipelines for products, billing cycles, and user workflows, enabling fast queries and seamless React.js frontend integration via TypeScript interfaces.
- Implemented JWT authentication, role-based access control (RBAC), and robust business logic in Express.js with middleware for secure multi-user systems. Performed CRUD operations to manage Inventory in the medical shop.

Tech Stack: Node.js, Express, MongoDB, React

WorkWiz – Service Booking Platform

[GitHub](#)

- Built full-stack MERN application (MongoDB, Express.js, React.js, Node.js) connecting customers with service providers, featuring RESTful APIs, responsive UI with Redux Toolkit.

- Implemented Google OAuth and JWT authentication for secure user login, session management, and role-based dashboards, enhancing security with refresh tokens and bcrypt password hashing.
- Developed real-time chat using Socket.IO WebSockets and with message persistence, typing indicators, and offline delivery for seamless UX.
- Integrated Razorpay payment gateway with Express.js webhooks, MongoDB transactions, and fraud detection for secure transactions, achieving 40% success rate and instant order confirmations.

Tech Stack: Node.js, Express, MongoDB, React, Socket.IO, Razorpay, Redux Toolkit
